Live in Vinnitsa. Willing to relocate

Objective: Obtain a position java developer

## Summary:

I study programming for 2 years. Graduated from Vinnitsa IT Academy, where I studied programming, including C++, HTML, PHP, java-script. Most liked java for their opportunities and strict typing. Last year working and graduated java online courses "JuJa". Now I self-learning java at home. To improve knowledge independently develop small projects. Interesting in learning and professional development as a java developer.

## Skills:

- Java SE (Core, OOP, Exceptions, Collections)
- Java EE (Servlets/JSP)
- Spring Framework (Spring MVC, Spring JDBC template, Spring Security)
- ORM (Hibernate)
- Databases (PostgreSQL, SQLite, MongoDB)
- Junit
- HTML, CSS, JavaScript
- Maven
- IDE: IntelliJ IDEA, Eclipse

## Self wrote the following projects:

Sea Battle - training projects in IT Academy. Implemented in C++ algorithm that arranges ships and played at a high level of complexity to the user.

SQL CMD - console application to work with PostgreSQL database. Using java core implemented a database connection, recording, editing and deleting data in a table.  
<https://github.com/rozborsky/sql>

landing page - using Spring mvc created a simple 3-paged landing page. Implemented a registration and image upload to the server.  
<https://github.com/rozborsky/landingPage>

internet shop - using Hibernate create multi page website. Implemented registration and authentication buyers, shopping, add goods to cart. In development stage.
